Software License Agreement

The following is a legal software license agreement between you, the software end user, and ArcSoft, Inc. Carefully read this license agreement before using the product. Using the product indicates that you have read this license agreement and agree to its terms. If you do not agree to the terms, promptly return the package to the place where you purchased it within 10 days of the date you acquired it for a full refund.

Grant of License. This license permits you to use one copy of the software included in this package on any single computer. For each software licensee, the program can be in use on only one computer at any given time. The software is in use when it is either loaded into RAM or installed into the hard disk or other permanent memory.

A multi-seat license permit from ArcSoft is required if the program is going to be installed on a network server for the sole purpose of distribution by other computers, or if the program is going to be installed on and used by more than one computer.

Copyright. The software contained in this package is owned by ArcSoft and is protected by United States copyright laws, international treaty provisions, and all other applicable national laws. The software must be treated like all other copyrighted materials (e.g. books and musical recordings). This license does not allow the software to be rented or leased, and the written materials accompanying the software (if any) may not be copied.

Limited Warranty. ArcSoft, Inc., warrants that the software contained herein will perform substantially in accordance with the accompanying documentation. No Other Warranties. ArcSoft disclaims all other warranties, either express or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the Software, the accompanying written materials, and any accompanying hardware (if any).

No Liability for Consequential Damages. In no event shall ArcSoft or its suppliers be liable for any damages whatsoever (including but not limited to damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) which results from an inability to use this software, even if ArcSoft, Inc. has been advised of the possibility of such damages. Because some states/jurisdictions do not allow the exclusion or limitation of consequential or incidental damages, the above limitations may not apply to you.

U.S. Government Restricted Rights. The Software and documentation are provided with Restricted Rights. Use, duplication, or disclosure by the U.S. Government is subject to restrictions as set forth in subparagraph (c) (1) (ii) of the Rights in Technical Data and Computer Software clause at DFARS 252.227-7013 or subparagraphs (c) (1), (2), and (3) of the Commercial Computer Software - Restricted Rights at 48 CFR 52.227-19, as applicable, and any amendments thereto. The manufacturer is ArcSoft, Inc., 46601 Fremont Blvd., Fremont, CA 94538.

If this product was purchased in the United States, this Agreement is governed by the laws of the state of California; otherwise, local laws may apply.

and then click on your desired choice. To adjust the placement of your image, use the Move, Resize and Rotate buttons. Or simply use your mouse to drag and drop your image into position. When you are satisfied with what you've got, click OK. You will return to the Main Preview Screen with the newly cropped image. See online Help to learn more about frame options.

Edit Text Screen

Clicking the Edit Text button on the Main Preview Screen brings your selected image to the Edit Text Screen, where you can instantly add text to images. You can choose the font style, size, color and alignment of the text. In the Text Box in the lower left-hand section of the screen, you can type your caption, heading or message.

As you type, the text will appear at the top of your image. With the cursor, you can manually move and place the text anywhere on the image. Once finished, click OK to accept the text or click New Text to start all over. See online Help to learn more about edit text options.

INTRODUCTION

Welcome to ArcSoft PhotoPrinter® 2000 Pro

ArcSoft PhotoPrinter® Pro is a versatile printing utility that lets you quickly print multiple copies of an image or several different images on a single sheet of paper. It's as simple as opening your image, selecting from an assortment of templates and clicking Print!

Special features include:

- **Fun, easy-to-use interface screens** to guide you through your projects
- **TWAIN-compliance for importing images** from digital cameras and scanners
- **ArcSoft's exclusive Album Manager** for organizing your digital photos
- **Image editing tools** for cropping, rotating, color adjustment and special effects
- **Tools** for adding text to your images
- **Tools** for creating your own templates
- **Customized frames, edges, calendars** and more
- **Support for KODAK DIGITAL SCIENCE Inkjet Photo Paper Templates**
- **Support for Avery products**
- **Support for popular image file formats** including BMP, TIF, JPG, GIF, PCD (read only), PCX, TGA and FlashPix

Crop Photo Screen

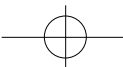

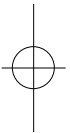

Clicking the Crop Photo button on the Main Preview Screen brings your selected image to the Crop Screen. Here you can trim your image, keeping just the portion you want to print. Simply use the Crop Menu arrow at the upper left-hand corner to choose between Landscape and Portrait crop orientations. Use the scrollbar to browse the available choices, and then click on your desired choice. Adjust the position and scale of the crop selection box with your cursor. When you are satisfied with what you've got, click OK. You will return to the Main Preview Screen with the newly cropped image. See online Help to learn more about cropping.

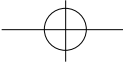

Edit Screen

Clicking the Edit Photo button on the Main Preview Screen brings your selected image to the Edit Screen, where you can enhance your images. Just use the Edit Menu arrow at the upper left-hand corner to choose between Enhancements and Effects. Use the scrollbar to browse available edit and enhancement options, and then click on your desired choice. Adjust the intensity of the selected enhancement or effect by holding down the +/- button. When you are satisfied with what you've got, click OK. You will return to the Main Preview Screen with the newly cropped image. See online Help to learn more about edit options.

Frame Photo Screen

Clicking the Frame Photo button on the Main Preview Screen brings your selected image to the Frame Screen, where you can "dress up" your image in a number of ways. The Frame Menu arrow at the upper left-hand corner lets you choose between Frames, Borders, Edges, Shapes or Calendars. Use the scrollbar to browse the available options,

Other Screens

In order to move from the Main Preview Screen to other screens, and vice-versa, you will need to have a good understanding of how to use the Save As, OK and Cancel buttons.

Save As - opens the standard Windows Save As dialog box so you can save your image with the changes you've made.

Note: If you want to keep the original, be sure to make a copy of the image under a different name before editing.

OK - returns you to the Main Preview Screen and places the selected image (with changes you've made if any,) in the Page Preview Window.

Note: OK will not *permanently* save the changes you've made to an image. To keep the changes you've made, you must use Save As.

Cancel - returns you to the Main Preview Screen without saving any of the changes made.

Album Manager Screen

Clicking the Get Photo button on the Main Preview Screen takes you to the Album Manager Screen where you can select images. Here you will find controls for creating new photo albums, sorting photos, deleting thumbnails from your albums, and acquiring photos from digital cameras or scanners. See online Help to learn more about creating and naming albums.

Note: An Album contains thumbnails, which are miniature representations of actual image files.

System Requirements

For PC:

- Windows 95/98/2000/NT
- Pentium-based PC or equivalent
- 60 MB free hard disk space
- 32 MB RAM
- 16-bit (or higher) color display
- CD-ROM drive
- Mouse

For Mac:

- Power PC
- Mac OS 7.5 - 9
- 85 MB free hard disk space
- 64 MB RAM (32 MB with virtual memory)
- 16-bit (or higher) color display
- CD-ROM drive
- Mouse

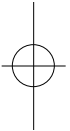

Installing and Starting PhotoPrinter® 2000 Pro

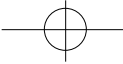

For PC users: To install: Insert the PhotoPrinter 2000 Pro CD in your CD-ROM drive. Click Start/Run and type D:\Setup.exe (where "D" is your CD-ROM drive). Click OK. Follow the instructions on the screen.

To start: Click Start/Programs. Go to the ArcSoft PhotoPrinter 2000 Pro folder and click PhotoPrinter 2000 Pro. (To uninstall, click Start/Programs. Go to the PhotoPrinter 2000 Pro folder and click Uninstall.)

For Mac users: To install: Insert the PhotoPrinter 2000 Pro CD in your CD-ROM drive. Click on the CD icon to bring up the ArcSoft window. In the ArcSoft window, click the PhotoPrinter 2000 Pro Installer icon to start installation.

To start: Click the Macintosh HD icon on your desktop. In the Macintosh HD window, click the PhotoPrinter 2000 Pro icon to open the PhotoPrinter 2000 Pro program folder. Find the PhotoPrinter 2000 Pro program icon, and click to open it.

GETTING ACQUAINTED

Quick Start Tutorial

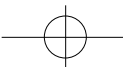

In addition to this Quick Start Guide, PhotoPrinter 2000 Pro provides you with online Help which can be accessed by clicking the online Help (?) icon at the upper right-hand corner of the screen. Online Help includes a Quick Start Tutorial that leads you through a sample project, as well as **visual help** to provide a quick viewing guide that makes learning the program screens and controls as easy as the click of your mouse!

Help Index Screen

Navigation Diagram

The following diagram shows how each of PhotoPrinter's five interface screens relate to one another. As you can see, the Main Preview Screen acts as your "home base". From the Main Preview Screen, you have access to all of PhotoPrinter's functionality.

New Project

This button removes all images from the Page Preview Window, allowing you to begin a new project.

Controls

These three buttons are displayed throughout every PhotoPrinter 2000 Pro screen.

Help - opens online Help. Click "Index" or "Search" to look up specific PhotoPrinter functions. This is a great resource for learning more about the program!

Minimize - leaves PhotoPrinter running in the background so you can work in other programs.

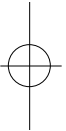

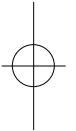

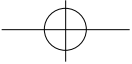

Exit - closes PhotoPrinter completely.

Printer Control Buttons

The following buttons control your printer settings:

- **Print Setup** - gives you standard Windows printing options: printer type, paper size and layout orientation (portrait or landscape).
- **Copies (+/-)** - lets you set the number of copies you want to print.
- **Print** - prints the image(s).

Template Preview Window

This window shows the available templates (up to three at a time) for the selected template category. To view more templates, click the up/down arrows. To choose a template, simply click on it. The selected template will be highlighted and will appear in the Page Preview Window.

Get Photos

This button takes you to the Album Manager Screen where you can manage image files and select them for printing. See "Album Manager Screen" on page 11.

Crop Photo

This button brings your selected image to the Crop Screen where you can trim it to meet your needs. See "Crop Screen" on page 12.

Edit Photo

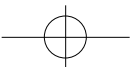

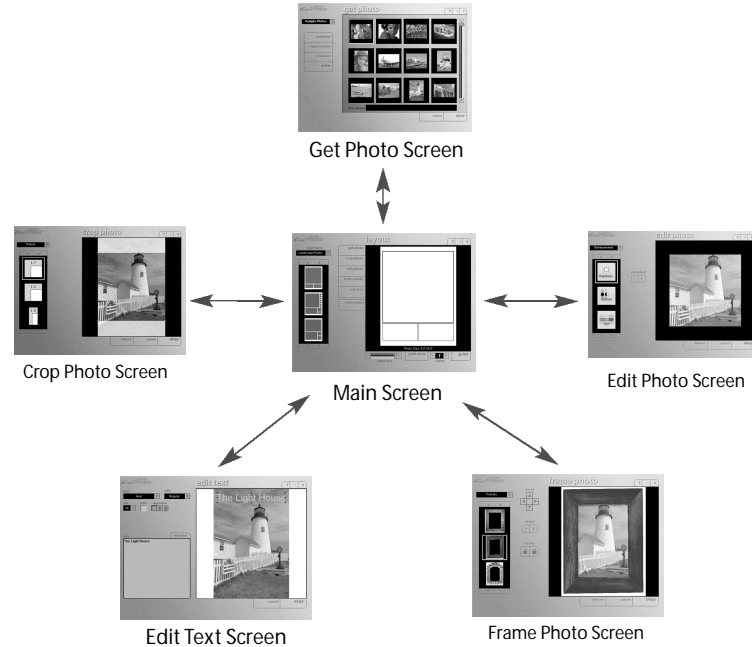

This button brings your selected image to the Edit Screen where you can enhance or modify the image with special effects. See "Edit Screen" on page 12.

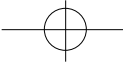

Frame Photo

This button brings your selected image to the Frame Screen where you can place it in a variety of artistic frames, borders, edges and calendar backgrounds. See "Frame Screen" on page 12.

Edit Text

This button brings your selected image to the Edit Text Screen where you can add text to each image. See "Edit Text Screen" on page 12.

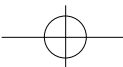

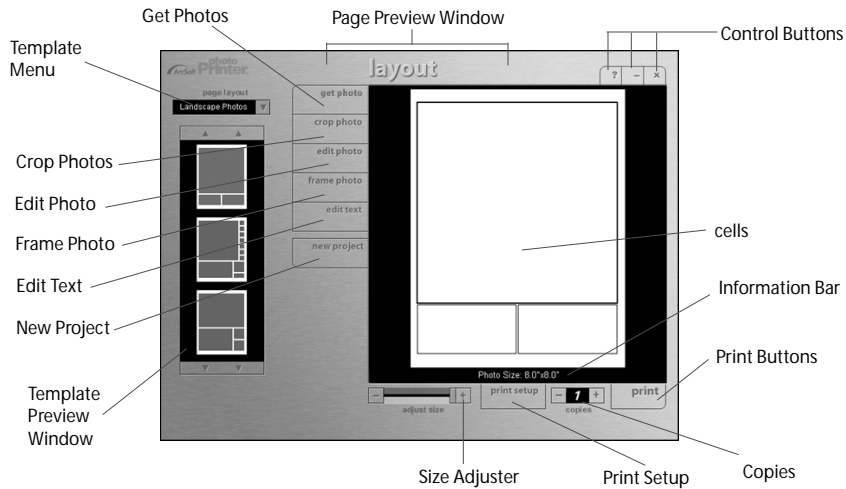

WORKING WITH PHOTOPRINTER 2000 PRO

Main Preview Screen

The Main Preview Screen is the introductory point to PhotoPrinter 2000 Pro. It contains controls that let you quickly access the various screens of the program, i.e., "Get Photo", "Crop Photo", etc. It is also a place where you may select a print layout template, select printer settings, and set the number of copies you wish to print.

Page Preview Window

This window gives you a preview of how your printed page will look. It functions as a page layout area where you can copy an image from one cell to another by drag-and-drop. You can also right-click on an image to take advantage of the Rotate, Cut, Copy and Paste options (for PC only).

Cell

A cell is one of the rectangular areas in a template that contains images.

Size Adjuster

This tool, located at the bottom of the Page Preview Window, can be used for adjusting the image size as well as the space between images.

Information Bar

When you put the cursor over a cell, the Information Bar will display the size of the image contained in that cell.

Template Menu

This menu allows you to choose from a variety of template categories (e.g. Landscape, Portrait, etc.). The up/down arrows let you browse and select a template category. Once a category is selected, the corresponding templates will be shown in the Template Preview Window. See online Help to learn more about template categories.
